

Sisto metal

Sisto is a carefully designed table combining style with stability. This table is very convenient for wheelchair users, thanks to the absence of side rails under the tabletop.

Support

- The legs are made of a square metal tube 40 x 40 mm.
- Each leg is fixed to the tabletop by means of a metal support with a central hidden fastening.
- The underside of the tabletop has no side rails, so that a free height of 73,5 cm is always guaranteed for the Sisto table.
- Wheelchair-accessible.
- The metal legs are finished with an epoxy coating.
- The legs are equipped with synthetic glides.

Tabletop

- The top is made of a stratified chipboard (thickness: 20 mm).
- The top and bottom of the tabletop are finished with a HPL layer.
- The table edges are finished in accordance with the choice of the tabletop (with a PVC layer or a veneered layer protected by a coat of varnish).

Central hidden fastening.

Colours

We would like to refer to our extensive colour gamut. Sample card + samples available on request.
